

**INDUSTRIAL YARNS
PP CF YARNS
HDPE & PP
MONOFILAMENT YARNS
PP TAPES
BCF & FRISE YARNS**

Polypropylene Multifilament & Tape Yarns, High Density Polyethylene & Polypropylene Monofilament Yarns, Polypropylene BCF, Heat-Set and Frisé Yarns for:

- Webbing & braided ropes
- Sewing
- Filtration fabrics
- Nets
- Belts
- Slings
- Weaving
- Woven & tufted carpets

ENHANCED INDUSTRIAL YARNS

FOR TOP QUALITY WEBBINGS, ROPES, FABRICS & CARPETS

PP CF YARNS

- **Polypropylene Multifilament Yarns** of high and medium tenacity
- Ideal starting material for **weaving, braiding, twisting, filtration fabrics**.
- **Resistant** to acids and alkalies.
- High quality twisting ensuring **excellent results in warping, weaving, braiding** and a **smooth performance in sewing**.
- **Precision winding** available for coarse yarns.

HDPE & PP MONOFILAMENT YARNS

- High Density Polyethylene & Polypropylene Monofilament Yarns of **high and medium tenacity**.
- Ideal starting material for **weaving, braiding, twisting, filtration fabrics**.
- Shape: **Flat and round**.
- **Resistant** to acids and alkalies.
- High quality spinning ensuring **excellent results in warping, weaving and knitting**, especially for the filtration fabrics production.
- Winding on **bi-cones and spools**.

PP TAPES

- Manufactured from **extruded polypropylene film**.
- Ideal for **sewing and weaving**.
- **Denier range:** 1,000 - 30,000.
- **Fibrillated** or not.
- **Easy to splice**.
- **Chemical resistant**.

BCF, HEAT-SET & FRISE YARNS

- Manufactured from **100% polypropylene**.
- **Liquid repellent**.
- **Quick-drying**.
- **Inhibit bacteria growth**.
- Ideal as **pile yarns for woven and tufted carpets**, aimed at various **end-use applications** (automotive, residential, contract).

All Thrace Group Yarns can be UV stabilised upon request and come in a rich variety of colours, with tested colour fastness.
