 **THRACE POLYBULK**

MEMBER OF THRACE GROUP

# INDUSTRY LEADING EXPERTISE ACROSS THE GLOBE

Thrace Polybulk is the global frontrunner in logistical solutions based on FIBC technology, designing, developing and manufacturing advanced industrial bulk packaging products since the early 1970's.

Thrace Polybulk offers a complete range of packaging solutions within the big-bag segment. Products are based on polypropylene and polyethylene (PP/PE) plastic materials and include bags and equipment for filling, handling, storing and protecting the packed products. Operating from our head office in Brevik, Norway, Thrace Polybulk is a global organisation, serving customers in Northern and Western Europe, North and South America, Asia and Australia.

Thrace Polybulk is a part of the Thrace Group with its corporate headquarters in Athens, Greece. The Thrace Group is a global leader, which specialises in the production of PP/PE-plastic based products, in the fields of industrial packaging, consumer packaging and technical fabrics, with production facilities across Europe and in the USA. Over 1,700 employees manufacture 80,000 tonnes of polymers annually.

# RELIABLE SOLUTIONS FOR YOUR EVERY NEED

Thrace Polybulk offers a complete range of packaging solutions within the big-bag segment, including all types of bags as well as equipment for filling, handling, storing and protecting the packed products.

Being the global leader in advanced logistical solutions based on FIBC technology, the flagship of the Thrace Polybulk range is the automatic filling system for big-bags. Our automatic filling systems not only guarantee a high and consistent output, they also provide major health and safety advantages, cost savings due to reduced manning and are environmentally friendly, as the need for wooden pallets is reduced.

Advanced automatic packaging lines require advanced bag designs. Thrace Polybulk has also developed high quality bags, specially designed for the automatic packaging of 1, 2, 4 and 5 loop bags. We have also worked closely with customers for decades designing and developing a wide range of complementary products, such as handling and storing devices, that make our customers' lives easier and more efficient.

# **SOLUTIONS TAILORED** **TO YOUR SPECIFIC REQUIREMENTS**

Our dedicated team of innovative and highly experienced professionals work together with customers to find better, more effective solutions to their individual needs.

Through our higher level of competence and know-how, we are able to offer consultancy services for logistical improvements and packaging solutions tailor-made to suit any customer need. We believe in long term relations with customers. By working closely together over time, we are able to develop solutions that suit their individual needs and requirements, even as they change and develop.

All Thrace Polybulk solutions are of the highest quality, tried and tested in the industry for decades and built based on our long experience and know-how. We ultimately aim to help our customers to improve their logistical value chain. A flexible global production and distribution system, through in-house production combined with a unique sub-production and distributor system worldwide, means we are able to offer local service to multinational companies with global packaging requirements, as well as to smaller companies across the globe.
