STRETCH HOOD

100% PE

www.thracegroup.com

 **THRACE GROUP**

A WORLD OF MATERIALS & SOLUTIONS

PROTECTING LOADS WHILE SAVING COSTS

Thrace Group Stretch Hood is made of PE film with excellent deformation resistance & thermal stability, and comes with UV resistance for long term exposure to the sun.

It is the ideal solution for the palletisation of various products such as bagged goods, beverages, heavy-duty shipping sacks (HDSS), bricks and building products, and is specially designed to provide excellent load protection, load stability and load visibility along with good line speed, capital cost and cost per pallet.

FEATURES

- **Printing potential**
- **UV resistant**
- **Colours:** transparent / wide range of colours
- **Circumference:** up to 4 m
- **Thickness:** from 90 up to 200 µm

BENEFITS

- **Effective branding**
- **Cost reduction**
- **Easy handling**
- **Weather protection**
- **Unitisation of throughput**

STEP BY STEP STRETCH HOOD FILM IN PALLET

A typical process:

1. The film tube is cut and top-sealed **2.** The grippers' system stretches the hood **3.** The film is applied to the pallet load **4.** The grippers place the hood under the pallet **5.** The load is locked in the film.
