ENERGY POLICY

THRACE Nonwovens & Geosynthetics S.A. recognizing its role in society and in particular the impact its operation can have on the directly associated areas, seeks sustainable development and is committed, through its policies on Quality, Environment and Energy Management, to always be a valuable social partner.

THRACE Nonwovens & Geosynthetics S.A. is mainly involved in the production of geotextiles, groundcover fabrics, biaxial geogrids, synthetic fibers and filaments, spunbond non-woven fabrics, needle-punched non-woven fabrics, circular fabrics, ropes, belts, twines and laminated fabrics.

Taking advantage of the latest scientific research, an integrated energy policy model has been developed and implemented at the Xanthi plant, aiming at continuous energy saving, more efficient management and the production of products with the lowest possible environmental impact. Continuous improvements, equipment upgrades, and the adoption of new practices are the tools to achieve this goal.

In addition, the Company complies with the requirements of ISO 9001:2015 and ISO 14001:2015 and is committed to continuously improving its quality management and environmental performance. In the context of this commitment, the Company informs and educates its employees on quality management, environmental issues and on energy-saving matters.

The framework and mechanism for defining and reviewing the objectives and targets in Energy Management issues is set out in the System's regular reviews by Management.

The Energy Management System includes actions and measures for:

- Use of energy-efficient equipment and services to optimize energy efficiency.
- Continuous improvement of our system and energy performance by monitoring appropriate indicators.
- Reduction of environmental footprint
- Appropriate training and dissemination of information, enabling the staff involved to make a substantial contribution to optimal energy management.
- Compliance with legal and other regulatory requirements related to energy uses - consumption and energy efficiency.

Our Energy policy, combined with Total Quality, Innovation, Human Resources and the Environmental Policy, make up the production organization and are important pillars for the Company's growth.

This policy applies to THRACE Nonwovens & Geosynthetics SA and is part of the policy of THRACE GROUP.

In the context of Energy Policy, the Company's management is committed to complying with all of the above.
